“SHAKE, RATTLE AND ROLL”

Create a damage prevention program through the use of Shockwatch labels, Tiltwatch labels and Shockwatch clips. Use the Shockwatch and Tiltwatch labels to monitor your packaging; use the Shockwatch clips to monitor your products. Use of these devices can add a preventative edge to your packaging, help bring damage claims to a quick resolution and aid in building good carrier and customer relationships.

Please contact us regarding the product details for your application.

TOO HOT, TOO COLD OR JUST RIGHT

Designed for application directly to your product to immediately indicate if shipments have been subject to temperature extremes beyond what you would expect. They keep you in control even after your product has been shipped.

Heatwatch: For monitoring the temperature of heat sensitive products.

Coldwatch: For monitoring damaging cold temperatures.

Warmwatch: For monitoring the duration of damaging temperatures.

There are temperature ranges inherent to these products. Please contact us regarding your application.
